PROFESSIONAL SUMMARY

Fresh Information Technology graduate and full-stack developer with hands-on experience building, testing, debugging, and maintaining web applications using modern JavaScript frameworks and backend technologies. Comfortable writing clean, well-documented code, resolving software defects, and collaborating with clients and teammates to turn requirements into reliable, working solutions. Eager to learn new technologies and grow as a software developer within a supportive development team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, PHP, HTML5, CSS3, SQL

Frontend: React, Angular, Tailwind CSS, Bootstrap, jQuery

Backend & APIs: Node.js, Express.js, Spring Boot, Laravel, CodeIgniter, REST API design

Databases: PostgreSQL, MySQL, MongoDB

Testing & Tools: Unit testing, debugging, code review, Git, GitHub, Postman, VS Code

Deployment: Ubuntu VPS, Nginx, PM2, WordPress

Concepts: MVC architecture, authentication, role-based access control, system design, technical documentation

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelance) — Cequena Training & Consultancy *Sep 2025 – Mar 2026*

- Developed and maintained a webinar and product-listing platform for a PRC-accredited training provider, working from client requirements through to delivery.
- Designed and implemented REST APIs and the PostgreSQL database architecture for scalable content management.
- Built responsive, user-friendly interfaces for educators and learners using React, TypeScript, and Tailwind CSS.
- Implemented booking and content-management workflows, then tested and debugged them to ensure reliable performance.
- Deployed and maintained the application on an Ubuntu VPS using Nginx and PM2.

Tech: React, TypeScript, Node.js, PostgreSQL

Full-Stack Web Developer Intern — Business Web Solutions (BWS) *Feb 2026 – Apr 2026*

- Completed a structured full-stack development internship covering modern web technologies and real-world project workflows.
- Developed web applications and integrated RESTful APIs with database-driven features using HTML, CSS, JavaScript, React, and backend technologies.
- Applied debugging, testing, and problem-solving across multiple project modules, and implemented feedback from senior developers.

Full-Stack Web Developer Intern (OJT) — PhilHealth Head Office *486 hours*

- Developed the CipherKey Ticketing System for managing internal requests and document workflows.
- Implemented file uploads, input validation, and automated email notifications, and prepared supporting documentation.
- Digitized manual processes, improving internal processing efficiency.

Tech: PHP, CodeIgniter, MySQL, JavaScript, Bootstrap

Web Developer (Freelance)

Apr 2020 – Jun 2021

- Converted Figma and PSD designs into responsive, cross-browser-compatible web pages.
- Optimized mobile-first layouts and improved page performance.
- Collaborated with clients to translate design requirements into functional UI.

Tech: *HTML, CSS, Bootstrap, JavaScript, jQuery, WordPress, PHP*

KEY PROJECTS

Music Chords Web App — *React, TypeScript, Node.js, Express, PostgreSQL*

Mobile-first chord-sheet platform with song search, key transposition, and lineup management; designed the PostgreSQL schema for scalable organization and filtering, and deployed to a VPS with Nginx and PM2.

MadamF-Store Inventory System — *Java 21, Spring Boot 3.4, PostgreSQL, React*

Inventory and stock-management application with low-stock alerts, category/status filtering, and customer-credit tracking, backed by a Java Spring Boot REST API.

GA Alliance — *Laravel 12, PHP 8.3, React, MySQL*

Web app for managing an in-game alliance, featuring main-account login, role-based permissions, attendance and loot-split tracking, and full activity audit logging.

MIHIS — Malnutrition & Immunization Health Information System (Capstone) — *Angular, TypeScript, Node.js, Express, MongoDB*

Healthcare system managing patient immunization and malnutrition records, with e-vaccination cards, scheduling, and automated SMS/email notifications for barangay health workers.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

2025

Jose Rizal University

CERTIFICATIONS

- Angular – The Complete Guide (2025) — *Udemy*
- JavaScript Unit Testing — *Code with Mosh*
- Ultimate JavaScript Part 1: Fundamentals — *Code with Mosh*
- The Ultimate HTML5 & CSS3 Series: Part 3 — *Code with Mosh*
- Claude Code — *Code with Mosh*
- CompTIA ITF+ — *Jose Rizal University*
